## Korea - technical perfection over physical size (Part 1)

by

**Zoltán Marczinka**

Korea entered the competition with a brave and very courageous playing style against Qatar, dictating a very high pace in the first half. In order to compensate for their lack of height, the dynamic and technically well skilled Korean team utilised the air space above the goal-area. In the first half, within the space of 15 minutes they attempted to score with a spectacular volley shot 4 times and each time were successful. These pre-trained actions were set up from the wing position: either the left wing (video clip **1** and **3**) or the right wing (video clip **4**) was the initiator or used this skilful technical-tactical element as a continuation of an extended fast break (video clip **2**).
